

F. Final Deliverables

In addition to the Technical Report, various types of deliverables were developed to communicate the key findings of the FASP 2035 Update to specific audiences. Each deliverable was created to specifically highlight the aspects of the analyses most relevant or applicable to the audience's interests in the state aviation system. These deliverables include:

- Executive Summary
- Summary Report
- Continuing Florida Aviation Systems Planning Process (CFASPP) Regional Brochures
- Executive Summary Primers

A copy of each of these deliverables is provided in this appendix.

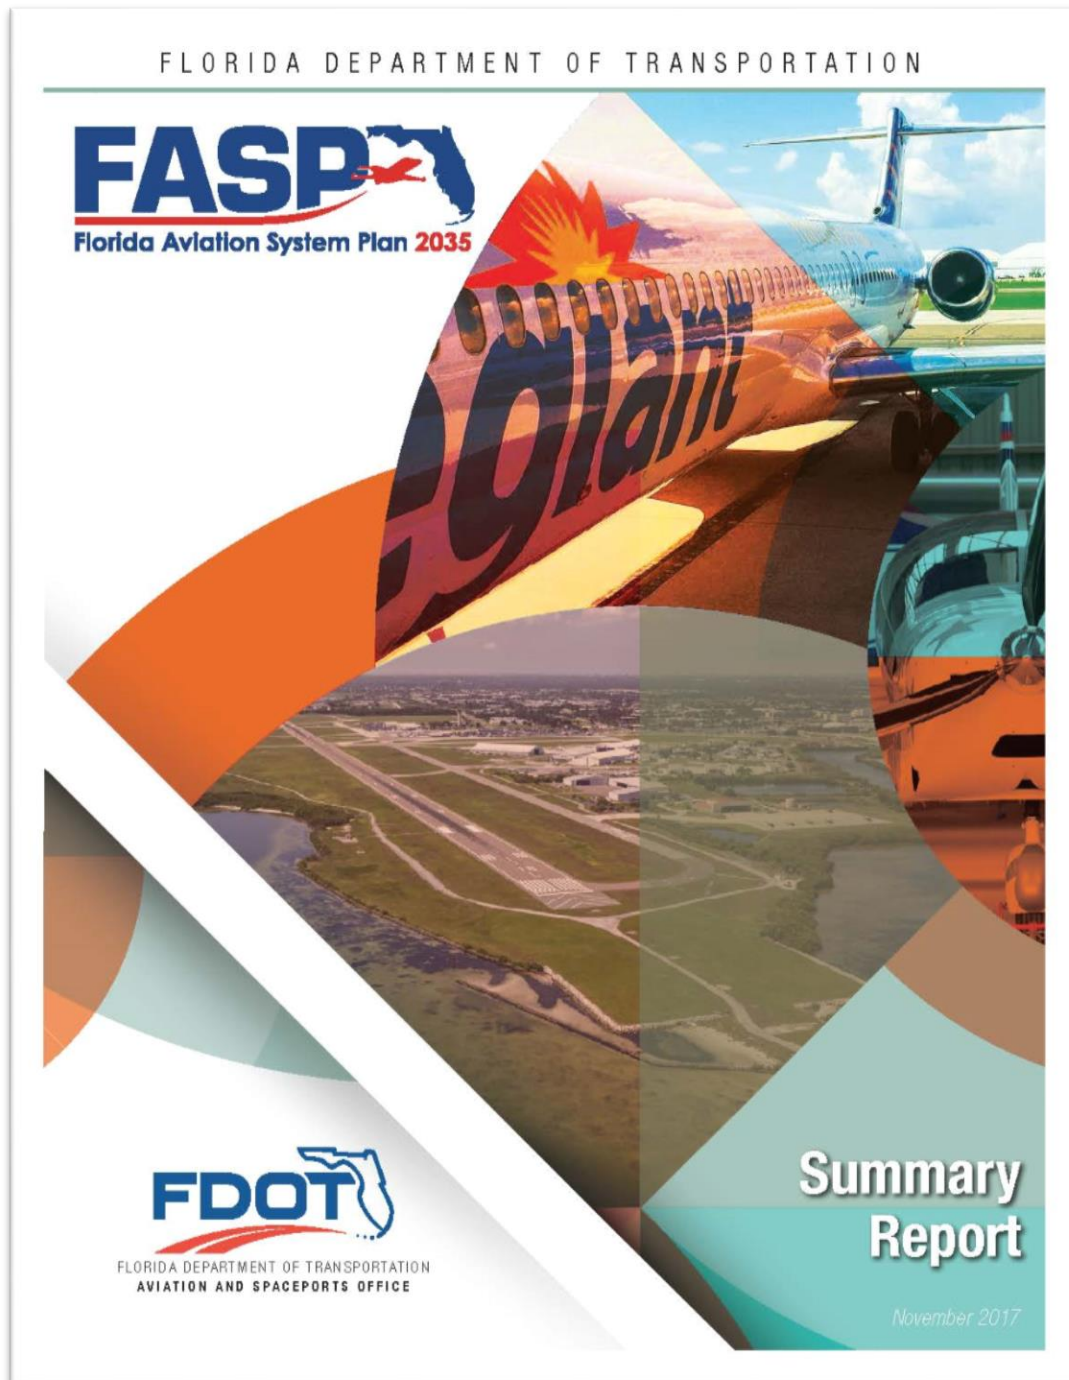

F.1 Executive Summary

The Executive Summary highlights the key outcomes of the FASP 2035 Update from statewide- and FDOT District-level perspectives. The document is tailored to technical and non-technical audiences by providing content that is understandable to readers unfamiliar with aviation system planning and detailed enough to be of interest to those with more engagement in the industry.

F.2 Summary Report

The Summary Report provides an abridged version of the Final Technical Report and includes information about the future of aviation in Florida at the statewide and FDOT District levels. This document is tailored to technical and non-technical audiences and provides more detail than the Executive Summary.

F.3 CFASPP Regional Brochures

The CFASPP Regional Brochures summarize the results of the FASP 2035 Update relative to Florida's nine CFASPP Regions/Metropolitan Areas (MAs). The deliverables highlight the primary aviation drivers within each CFASPP Region/MA and provide details about the study results applicable to each. The Regional Brochures also present selected airport-specific data, which may be valuable to airports, airport sponsors, and other regional and local aviation stakeholders involved in airport or other planning efforts.

F.4 Executive Summary Primers

Four Executive Summary Primers present the findings of the FASP 2035 Update most relevant to the following audiences:

- Airport Managers and Consultants
- Policymakers
- FDOT
- General Public

The primers consider the needs, interests, and technical familiarity of the target audiences and highlight how the FASP 2035 Update can be leveraged in their own unique planning efforts.
