About Ormond Beach Municipal Airport

Ormond Beach Municipal Airport (OMN) is a city-owned general aviation (GA) airport located in Ormond Beach, approximately eight miles north of Daytona Beach. The airport has two intersecting paved runways, the longest of which (Runway 09/27) measures 4,005 feet long by 75 feet wide. Together with crosswind Runway 17/35, OMN's facilities provide pilots with a robust flight environment in variable wind conditions, ideal for the flight training activities that account for more than 80 percent of OMN's traffic. This is mostly led by Sunrise Aviation, which bases approximately 90 aircraft at the airport and attracts domestic and international students. Additionally, itinerant student pilots from Embry Riddle Aeronautical University and Phoenix East conduct touch-and-go operations at OMN. OMN is currently experiencing a growing number of operations associated with corporate/business aviation and national defense activities, including Exercise America's Shield led by the Civil Air Patrol. OMN is also home to Tomlinson Aviation, a large rotorcraft fixed-base operator (FBO) that operates a fleet of several helicopters. The FBO provides rotorcraft maintenance, firefighting support, power line repairs across the state, and flight training including instruction for agriculture spraying.

STUDY OVERVIEW

Florida's over 125 public-use airports are economic engines for the state, representing some of the largest aviation facilities in the world and providing critical transportation connections for their local communities. By supporting jobs both on- and off-airport property, Florida's airports support the infrastructure necessary for important activities such as manufacturing, logistics, tourism, and emergency response.

In 2021, Florida welcomed over 43 million out-of-state visitors through its commercial service airports and over 4.6 million visitors through its general aviation airports. Over 3,500 businesses operate at Florida's airports and their 161,000 direct employees create substantial economic impacts.

To help quantify and communicate these immense contributions, the FDOT Aviation Office initiated the development of the 2022 Florida Aviation Economic Impact Study. This study calculates each airport's annual monetary contribution to their local, regional, and statewide economies. This study determined that Florida's aviation system generated 2,009,088 jobs and contributed \$336 billion in 2021 to the state's economy, accounting for 13.5% of Florida's gross domestic product (GDP).²

²Totals include new off-airport air cargo impacts developed for this update

What is Economic Impact?

The economic impacts of each airport and the state are defined by the total jobs, payroll, value added, and economic impact (output) generated by aviation in the state. These are defined as:

JOBS

The sum of full-time and part-time employees, and account for the total number of people employed as a result of the airport or company within a defined geography or industry.

PAYROLL

Total compensation for work, including gross wages, salaries, employer-provided benefits and taxes paid to governments on behalf of employees.

VALUE ADDED

Consists of compensation of employees, taxes paid on production and imports, and gross operating surplus. Value added equals the difference between an industry's gross output and the cost of its intermediate inputs.

ECONOMIC IMPACT (OUTPUT)

The value of sales or receipts and other operating income along with any inventory change (e.g., spoilage, breakage, or theft). It is the equivalent of value added plus the cost of all intermediate inputs (including energy, raw materials, semi-finished goods, and services) that are purchased from all sources/locations.

OFF-AIRPORT AIR CARGO

Off-airport air cargo is a new component of this study which assesses the cargo activity that interacts with Florida's businesses and relies on Florida's airports. The off-airport air cargo component was developed to highlight Florida's diverse industries that depend on airports to support business activity.
