### About Wauchula Municipal Airport

Wauchula Municipal Airport (CHN) is a general aviation (GA) airport located approximately five miles southwest of Wauchula in south-central Florida. The single paved runway (18/36) is over 4,000 feet long and 75 feet wide. The airport frequently accommodates traffic from recreational GA pilots and passengers, as well as business/corporate aviation. Visitors can enjoy a variety of recreational activities in Wauchula and nearby Zolfo Springs and Bowling Green. The area is home to several museums focusing on the history of central Florida; numerous natural preserves, parks, and wildlife refuges; and multiple golf courses. Harvest Aviation occupies one of the largest hangar facilities at CHN. This non-profit organization operates flights that directly support missionary work in Central and South America. Additional services offered at CHN include aerial agricultural spraying and aircraft storage. CHN hosts the yearly Bensen Days event, a showcase of gyroplanes, helicopters, and experimental aircraft. The event is attended by members of the local community as well as visitors who fly in from across central Florida.

## STUDY OVERVIEW

Florida's over 125 public-use airports are economic engines for the state, representing some of the largest aviation facilities in the world and providing critical transportation connections for their local communities. By supporting jobs both on- and off- airport property, Florida's airports support the infrastructure necessary for important activities such as manufacturing, logistics, tourism, and emergency response.

In 2021, Florida welcomed over 43 million out-of-state visitors through its commercial service airports and over 4.6 million visitors through its general aviation airports. Over 3,500 businesses operate at Florida's airports and their 161,000 direct employees create substantial economic impacts.

To help quantify and communicate these immense contributions, the FDOT Aviation Office initiated the development of the 2022 Florida Aviation Economic Impact Study. This study calculates each airport's annual monetary contribution to their local, regional, and statewide economies. This study determined that Florida's aviation system generated 2,009,088 jobs and contributed \$336 billion in 2021 to the state's economy, accounting for 13.5% of Florida's gross domestic product (GDP).<sup>2</sup>

## What is Economic Impact?

The economic impacts of each airport and the state are defined by the total jobs, payroll, value added, and economic impact (output) generated by aviation in the state. These are defined as:

### **JOBS**

The sum of full-time and part-time employees, and account for the total number of people employed as a result of the airport or company within a defined geography or industry.

### **PAYROLL**

Total compensation for work, including gross wages, salaries, employer-provided benefits and taxes paid to governments on behalf of employees.

### **VALUE ADDED**

Consists of compensation of employees, taxes paid on production and imports, and gross operating surplus. Value added equals the difference between an industry's gross output and the cost of its intermediate inputs.

### **ECONOMIC IMPACT (OUTPUT)**

The value of sales or receipts and other operating income along with any inventory change (e.g., spoilage, breakage, or theft). It is the equivalent of value added plus the cost of all intermediate inputs (including energy, raw materials, semi-finished goods, and services) that are purchased from all sources/locations.

### **OFF-AIRPORT AIR CARGO**

Off-airport air cargo is a new component of this study which assesses the cargo activity that interacts with Florida's businesses and relies on Florida's airports. The off-airport air cargo component was developed to highlight Florida's diverse industries that depend on airports to support business activity.
