## THE ECONOMIC IMPACT OF

# Okeechobee County Airport (OBE)

OBE

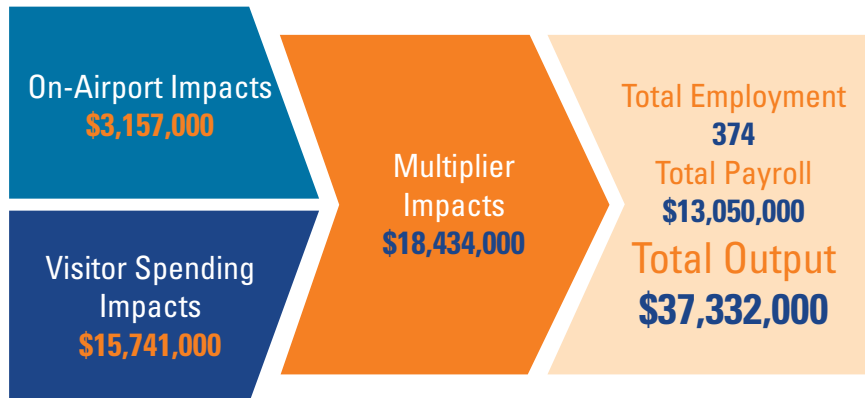

**FDOT**

## OKEECHOBEE COUNTY AIRPORT

Okeechobee County Airport is located about 93 miles south of Orlando and 110 miles northwest of Miami. The airport has two intersecting runways, with the longest runway measuring 5,000 feet. The airport supports general aviation and business jet aircraft.

The airport primarily supports corporate business activity, agricultural spraying, and flight training. The airport's on-site tenants contribute to its economic impact. For example, the Landing Strip Café is a favorite restaurant among locals. A paint shop is also located at the airport and provides aircraft painting for local users and visitors. The airport further benefits the region by supplying fuel for mosquito control and crop dusting. The airport also hosts numerous Aviation Flight Clubs, which schedule Fly-In activities. The airport's industrial park contributes to attracting economic development in the area.

Previous versions of this Study used different terminology to communicate results. The following terms were updated: Direct Impacts changed to On-Airport Impacts and Indirect Impacts changed to Visitor Spending Impacts.

## Florida's Statewide Benefits From Aviation

**Florida realizes significant economic benefits from aviation.** The Florida Department of Transportation completed a comprehensive economic impact analysis to measure these benefits. Benefits measured in the FDOT study considered on-airport impacts, visitor spending impacts, and multiplier impacts.

Florida's 129 public-use airports (including 20 commercial service facilities) are a major economic engine of the State's economy. The aviation system keeps Florida connected to the global marketplace while simultaneously driving local economies. Florida's airports provide space and infrastructure for important activities such as manufacturing, logistics, tourism, and emergency response. Below is a summary of the total statewide economic impact as well as the impact of District 1.
