## THE ECONOMIC IMPACT OF

## Bob Sikes Airport (CEW)

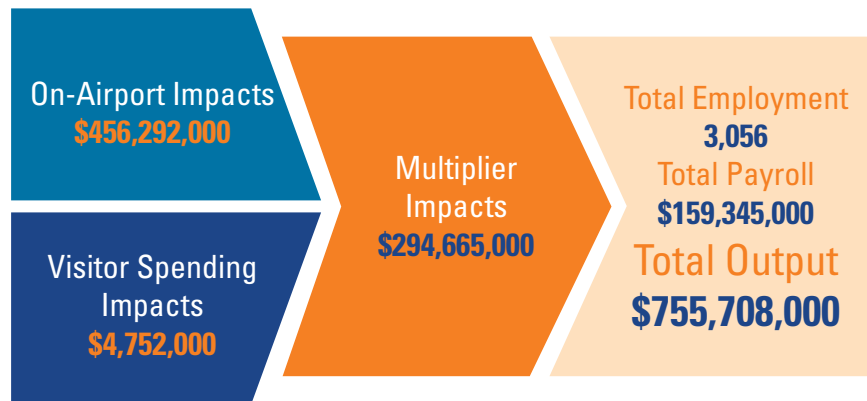

CEW

## BOB SIKES AIRPORT

Bob Sikes Airport is located in Okaloosa County, approximately three miles northeast of downtown Crestview. The airport has one runway that measures 8,004 feet. The airport accommodates large military transport aircraft and serves many types of general aviation and military activities.

The airport primarily supports military exercises, with nearby military bases conducting military flight trainings and career education at the airport. The airport's major tenants, such as a corporate contractor, contribute to its economic impact. The airport is engaged in the community and hosts an annual open house to showcase the facility. The airport also acts as a disaster response staging area for natural disasters.

Previous versions of this Study used different terminology to communicate results. The following terms were updated: Direct Impacts changed to On-Airport Impacts and Indirect Impacts changed to Visitor Spending Impacts.

## Florida's Statewide Benefits From Aviation

**Florida realizes significant economic benefits from aviation.** The Florida Department of Transportation completed a comprehensive economic impact analysis to measure these benefits. Benefits measured in the FDOT study considered on-airport impacts, visitor spending impacts, and multiplier impacts.

Florida's 129 public-use airports (including 20 commercial service facilities) are a major economic engine of the State's economy. The aviation system keeps Florida connected to the global marketplace while simultaneously driving local economies. Florida's airports provide space and infrastructure for important activities such as manufacturing, logistics, tourism, and emergency response. Below is a summary of the total statewide economic impact as well as the impact of District 3.
