### About Zephyrhills Municipal Airport

Zephyrhills Municipal Airport (ZPH) is in Pasco County, approximately 26 miles northeast of Tampa. The airport is publicly owned and operated by the City of Zephyrhills. The airport has two paved runways, the longest of which measures 5,000 feet long by 100 feet wide (Runway 05/23). However, Runway 01/19 is currently undergoing an extension project that will increase its length to 6,200 feet. The airport primarily supports recreational flying, with pilots either stopping to refuel or to enjoy a longer weekend visit. Pilots and passengers can have lunch at one of several local restaurants or experience the tranquility of one of several nearby natural areas, including the Crystal Springs Preserve, Hillsborough River State Park, or the Upper Hillsborough Preserve. The Pigz In Z'hills BBQ and Blues Fest is also a major draw. This an annual event showcases BBQ, blues music, classic cars, and a military history museum. The Zephyrhills Municipal Airport also supports frequent skydiving operations. Thrill-seekers from across the world come to train and experience skydiving at Skydive City Z-Hills. Other airport tenants include skydiving equipment manufacturers and retailers, as well as aircraft maintenance, repair, and detail shops.

## STUDY OVERVIEW

Florida's over 125 public-use airports are economic engines for the state, representing some of the largest aviation facilities in the world and providing critical transportation connections for their local communities. By supporting jobs both on- and off- airport property, Florida's airports support the infrastructure necessary for important activities such as manufacturing, logistics, tourism, and emergency response.

In 2021, Florida welcomed over 43 million out-of-state visitors through its commercial service airports and over 4.6 million visitors through its general aviation airports. Over 3,500 businesses operate at Florida's airports and their 161,000 direct employees create substantial economic impacts.

To help quantify and communicate these immense contributions, the FDOT Aviation Office initiated the development of the 2022 Florida Aviation Economic Impact Study. This study calculates each airport's annual monetary contribution to their local, regional, and statewide economies. This study determined that Florida's aviation system generated 2,009,088 jobs and contributed \$336 billion in 2021 to the state's economy, accounting for 13.5% of Florida's gross domestic product (GDP).<sup>2</sup>

## What is Economic Impact?

The economic impacts of each airport and the state are defined by the total jobs, payroll, value added, and economic impact (output) generated by aviation in the state. These are defined as:

### **JOBS**

The sum of full-time and part-time employees, and account for the total number of people employed as a result of the airport or company within a defined geography or industry.

### **PAYROLL**

Total compensation for work, including gross wages, salaries, employer-provided benefits and taxes paid to governments on behalf of employees.

### **VALUE ADDED**

Consists of compensation of employees, taxes paid on production and imports, and gross operating surplus. Value added equals the difference between an industry's gross output and the cost of its intermediate inputs.

### **ECONOMIC IMPACT (OUTPUT)**

The value of sales or receipts and other operating income along with any inventory change (e.g., spoilage, breakage, or theft). It is the equivalent of value added plus the cost of all intermediate inputs (including energy, raw materials, semi-finished goods, and services) that are purchased from all sources/locations.

### **OFF-AIRPORT AIR CARGO**

Off-airport air cargo is a new component of this study which assesses the cargo activity that interacts with Florida's businesses and relies on Florida's airports. The off-airport air cargo component was developed to highlight Florida's diverse industries that depend on airports to support business activity.
